

Replace your aging Prompter with a Tekskil High Performance LCD

Most CRT prompting systems in use today are more than ten years old, and, unlike fine wine, they do not get better with age. High voltage leakage, poor contrast, and fading phosphors add up to a prompter your talent

strains to read. First generation LCD panels are failing because of old backlight technology causing loss of contrast and very low brightness. If the beamsplitter and prompter platform are still in good shape, you may want to consider replacing the troublesome display with a new LCD panel. But before one of the technicians heads

over to Best Buy or your local Discount Warehouse - be aware that consumer LCDs aren't going to be a viable replacement. Beside the obvious issues of kluging mechanical mounts for a plastic case, dealing with RCA video jacks, and adding some electronics to flip the image - consumer panels are simply not powerful enough to provide a satisfying display for your talent. Since the system's beamsplitter gobbles up at least half the light output from the prompter display, the replacement LCD panel will need light output levels two to three times brighter than consumer units.

- Tekskil 15" displays will replace most models of QTV, Listec, Autoscript or Telescript CRT and LCD's
- Tekskil prompters are serious all-metal professional grade products Pro and Premium Series feature extruded metal enclosures for maximum strength
- Come complete with the latest technology high resolution displays having up to 1200 cd/m² (nits) of brightness and a 1000:1 contrast ratio
- Can be configured with a front mounted LED Tally light
- Ship with a pre configured adapter plate to bolt our replacement directly to your existing prompter
- Pro and Premium Series can support an Aux/Talent Assist panel dynamically suspended underneath the prompter and dampened free of vibration
- Very affordably priced

If you're planning a future camera and pedestal upgrade but are trying to hold off on replacing your old prompters, our heads will rejuvenate your system AND configure nicely with your future installation of an HD platform or robotic pedestal. The Tekskil replacement LCD is a proven solution - contact us for details.
